

VANINA VINCENT

(ARG / IT)

INSPIRING MUSIC FOR CREATIVE SOULS

Eclectic singer-songwriter | Creative researcher

BIO

Vanina is the transcendental expression of a unique **fusion of styles**. With her charge of passion, depth, femininity and elegance she brings to the stage an example of how to live your dreams. Born in Buenos Aires (Argentina) and raised in Italy in a creative family. Her artistic productions draws on her **South American roots**, blending **pop/folk** influences with **ethnic-electronic rhythms**. She studied opera singing techniques in Florence and introduced other instruments as a self-taught artist. In continuous research and evolution, Vanina offers a **solo show**, of which she is also a composer and producer. With a strong stage presence and a voice with a warm and vibrant tone, with her lyrics she spreads seeds of reflection and self-affirmation. At each show, she creates a tapestry of **voices, guitars and rhythms**, using **loops and acoustic instruments**, engaging the audience with exotic and colorful melodies.

PROJECTS

A supporter of freedom and self-production, she herself takes care of many of the aspects of the multi-dimensionality of making music today. A lover of interactions, she has conceived and created various **interdisciplinary projects**. One of these is the artistic crowns project, born during the pandemic to give the word **CORONA** a positive and proactive meaning. Each crown is proudly worn during her performances with the purpose of symbolizing and embodying individual empowerment and freedom. Wearing a crown carries a clear and concise message: to become queens and kings of ourselves again. For the creation of the crowns she collaborated with Sardinian, German and Italian artists who created for her unique and original artistic pieces.

MUSIC

Her debut **album BLOom (2020)**, well received by Italian and European critics, was enriched by the birth of a self-produced and self-financed interdisciplinary artistic project entitled "**Enciende el Color de la Musica**" (Turn on the color of music). "Enciende el color de la Musica" involved 8 artists of different nationalities to create original works inspired by listening to "BLOom". This project proposes a **unique and real experimental dialogue** between **music and painting**. In November 2022 Vanina Vincent released the **EP Vibrante**, published by Elastico Records (Bologna/IT) with world, ethnic and electronic sounds, confirming the open, elegant and refined sound experimentation that characterizes her. Her entire live show with the merchandising offered during her concerts is aimed at making music to be lived as a multi-sensory experience. Music can return to being experienced as an activator of consciousness, as a connection with other dimensions, as a mirror of the soul. *Vanina's message is to immerse ourselves together in this magic, always in joy!*
